# RADIO SHUTTLE RACKING

All Radioshuttle system components have been designed, engineered and manufactured by one company from the ground up to function as one system. A sophisticated system, yet easy to use.

## RADIO SHUTTLE RACKING

With Radio shuttle racking You gain 100% space, it's that easy Storing your high inventory items in racking designed for low inventory items wastes space. In the area Radio shuttle is deployed - pallet storage capacity is doubled.

Applications with multiple pallets of storage for each SKU, for example:

- + High volume SKU's .
- + The first point of storage after manufacturing .
- + Work in process .
- + Product produced and held for quality testing .
- + Sites that have a reasonably high turnover - greater than 5 times per year .
- + Facilities running out of space.
- + Storage layouts where deep lane storage is the best option .
